Zade's WORKSHOP RULES

Attendance:

- Attend workshop every bloody time. The workshop is counting on **YOU** and your ideas!!
- Be here both physically, and mentally!! That means come and be prepared to learn and participate. (Absolutely no hangovers!)
- Again, the workshop is a team effort and can't function without everyone being present and contributing.
- Credit or not, **attendance and participation is mandatory.**
  - Missing more than 5 days of class will result in an automatic drop.
  - And I'll be really pissed off.

Participation:

- Do it!! A workshop is based on collaborative learning. This is **our** workshop; **we function as a team.**
- The most important resources are found amongst your peers and yourself! Get to know each other and be involved!!
- There will be many opportunities for group activity, and a chance to go up to the board. (Yes, **everyone** will)
- Participation and the sharing of all our knowledge will make this workshop successful and inevitably make your grades higher.

Rules:

- Be Mature; Respect your peers and Facilitators.
- Pay attention to your Facilitators (they might have something important to say).
- Pay attention to your peers (they may understand a concept and have an easier explanation).
- Please don't talk when I am talking, I don't have a loud voice and it hurts for me to over power you guys.
- If you're lecture grade drops below a B, (which it shouldn't) you must attend mandatory tutoring.
- You may only switch workshops with approval from Ms. Fulton.
- I know it's hard, but who said life was easy.

I am looking forward to having a great semester with you!!
